12 Towel Ring 475.8.1
13 Towel Bar, one movable bar 475.9.2
14 Towel Bar, two movable bars 475.9.1

Mirrors, Mirror Cabinets and Mirror Units from System 475

The concept of colored nylon holders with smoked glass shelves is continued with mirrors, mirror cabinets and mirror units. Together with the bathroom accessories, they create continuity in the line. Illustrations 1 to 3 show only a small selection of the standard models available. There are also possibilities for creative and individual expressions in design. Depending on your own ideas, you can add shelves to the mirror cabinets or create a whole wall of shelf compartments. Illustration 4 shows two examples.

35 7/16", with 5 hooks 33.7010.90.4

[1]) Fastening method 6.4 not recommended for hollow walls

Bathroom Support Systems

This program of stationary supports, grab bars and seating systems has been developed especially for elderly and handicapped people. The nylon material, both functional and hygienic, maintains a mild temperature despite variations of heat or cold. All weight-bearing parts have corrosion resistant steel cores. Besides many standard constructions, specially designed items are available to meet your requirements.

The HEWI program meets the demand of architects and discriminating clients for clean lines and technical consistency. All the sections of the program are compatible, from the shower curtain rail to the mirror cabinet. When you choose HEWI, you solve many future coordination problems at once.

The program is comprehensive; all parts are available in the thirteen selected colors of the HEWI palette. The construction methods of the system make individual designs and varied combinations possible, for example, mirrors, shelf supports and mirror cabinets.

Carefully developed technology, precise workmanship and quality materials assure functional and durable products.

The nylon material is pleasant to the touch because its chemical composition is similar to natural materials such as ivory, wool and silk. Nylon, both functional and hygienic, maintains a mild temperature despite variations of heat or cold. Its smooth, non-porous surface is not receptive to micro-organisms or bacteria. It is resistant to cosmetics and does not attract dust, making HEWI products easy to clean. Surfaces can be cleaned with a damp cloth. Because the material is impregnated with color, it will retain its appearance even after years of constant use.

HEWI products have been designed for strength incorporating solid fastenings for ease of installation and safe function.
